

## Memopal at the 2010 CeBIT: organize and protect your files online

*Trade fair will be in Hannover from the 2<sup>nd</sup> to the 6<sup>th</sup> of March. Come and visit us!*

Rome, February 22, 2010. Memopal ([www.memopal.com](http://www.memopal.com)) will be presenting online backup and storage solutions for business and private users from March 2<sup>nd</sup> through 6<sup>th</sup> at the CeBIT in Hannover, Germany - [Hall 9, Booth B19](#).

Memopal is currently the #1 Online Backup provider in Europe. How Memopal will help you. It's an online backup and storage software that archives files in real time on remote servers. With Memopal, you can browse through your files and folders from any PC connected to the internet as well as from your mobile phone. Memopal automatically backs-up newly created files, is hassle free, and has complete respect for your privacy.

*"CeBIT it's a perfect occasion to meet our partners in person and get to know possibilities and demands of each other better"* - says the chairman of Memopal, Mr. Mario Zinno. The center of attention will be the Memopal Global File System, MGFS, which is the archiving technology created and used by Memopal. MGFS is a distributed file system that is designed to be highly reliable, scalable and very affordable. MGFS is natively indexed, which means that we are able to efficiently and effectively support real-time, mobile, and other applications. It will always be easy for us to develop technology that will assist you in the search and organization of your files.

With the amount of files people are accumulating these days, we think it is very important to have a quick file retrieval process. For example: from home, you have opened a document that was originally on your office PC and you have made changes to it. The most updated version is now stored on your home computer. Two weeks later, you need that document and you don't remember the file name or when you last modified it. By using our Memopal "Search", we are the only ones with the Search function in real time, you can access all of the latest Word documents you have worked on regardless of what computer you used. Memopal makes the management of your business life easier. From March 2<sup>nd</sup> through 6<sup>th</sup> at the CeBIT in Hannover, Germany - [Hall 9, Booth B19](#). Come and visit us!
